REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 1-65 are allowed.
2. The following is an examiner's statement of reasons for allowance: none of the prior art of the record discloses a radio receiver comprising: phase locked loop module operably coupled to produce a digital signal based on the filtered I signal and the filtered Q signal generated from the first and the second comb filters; a recovery module operably coupled to produce a data stream from the digital signal as recited in claims 1, 23, 28, 47, the data recovery module including: DC offset module operably coupled to receive the digital signal and to determine a DC offset using a first criteria during an acquisition mode and to determine the DC offset using second criteria during a tracking mode, wherein the DC offset module substantially remove the DC offset from the digital signal to produce a C adjusted digital signal; and data extraction module operably coupled to sample the Dc adjusted digital signal a sample rate to produce a data stream as recited in claims 8, 33, 52; low pass filter/equalizer module operably coupled to the phase locked loop to equalize and low pass filter the digital signal to produce an equalized and filtered signal as recited in claims 19, 43, 62.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
